

Hydroderm®

1 oz

Item Catalog Number: 00661

Collagen is the chief constituent of connective tissue that supports the structure of the skin. As collagen is depleted, visible signs of skin aging appear and then accelerate. The skin requires constant synthesis of new collagen to remain firm and youthful.

Hydroderm® liquid drops have been shown to deliver nourish collagen through the upper layer of the skin deep into the lower layers of the epidermis. The result is a reduction in the appearance depth of creases and the restoration of a more youthful appearance to skin in most people over age 40.

Maturity has many advantages, but there's no reason for your skin to look older than it has to. Life Extension® offers the Hydroderm® formula to members based on clinical studies and the improvements in skin appearance that have been shown.

References

Ingredients

Collagen (marine), water, alcohol, sodium methylparaben, phenoxyethanol, ethylparaben, propylparaben, butylparaben, isobutylparaben, methylparaben, serum protein, amniotic fluid, placental protein, calfskin extract, hydrolyzed collagen, imidazolidinyl urea, PEG-16, trisodium EDTA, potassium sorbate, citric acid, ascorbic acid.

Dosage and Use

- Shake well. Cleanse face and neck with warm water to help open pores.
- Apply drops onto palms of hands and/or fingertips.
- Apply generously over face and neck avoiding the eyelids.
- Use in the morning and evening.
- You will begin to see results within a few days, but for best results, we recommend use of product for 30-60 days or longer. The longer you use Hydroderm®, the better the results. Hydroderm® actually rejuvenates the collagen in the skin, so results last for months and will continue to work as long as you use the product.

Caution

For topical external use only. Avoid contact with the eyes.

Before using Hydroderm for the first time, test a small amount on your arm to see if any irritation occurs. Immediately discontinue use if you experience any redness or itching. Do not apply Hydroderm underneath the eyes or on top of the eyelids. Not for use by children under the age of 18 unless directed by a physician. Pregnant or nursing women should consult a physician before using this product.
