

## Ultra Rejuvenight

**2 oz jar**

Item Catalog Number: 00676

Scientists have known for years that your body rejuvenates while you sleep. They've also discovered that the skin works to rejuvenate itself during the nighttime hours. This realization led to Ultra RejuveNight®, a dream cream developed by Carmen Fusco, R.N., M.S., C.N.S., a research scientist and nutritional biochemist.

Ultra RejuveNight® contains nutrients that revitalize skin tone, enhance the appearance of elasticity and reduce the appearance of creases. Far more than just a moisturizer, Ultra RejuveNight contains potent antioxidants, including white and green tea extracts. Those tea extracts help to rejuvenate your skin and keep it younger looking.<sup>27</sup> Ultra RejuveNight® also contains:

- Two forms of vitamin C — fat-soluble ascorbyl palmitate and sodium ascorbyl phosphate
- Vitamin E — an essential nutrient that can decline in aged skin. Inadequate levels of E can decrease the appearance of skin elasticity and thickness
- Vitamin A — another antioxidant, which helps maintain the youthful appearance of your skin

All of these nutrients — as well as alpha-lipoic acid, beta glucan, RNA, DMAE, sodium hyaluronate, Ceraphyl NGA, Panax ginseng root, melatonin, DHEA, and other ingredients — are transported to the skin's lower layers by a revolutionary liposome delivery system called QuSome®. By eliminating the solubility problems of the cream's nutrients, this delivery system ensures its maximum effectiveness.

This version of Ultra RejuveNight® does not contain progesterone.
