

Eskimo-3®

105 softgels

Item Catalog Number: 4070

In the 1980s, researchers found that the high fish oil intake of the Eskimo people in Greenland helped offset the effects of their high fat diet. Recent studies have backed up this theory and shown the positive effects of fish oil on the cardiovascular system.

Results of an independent government test of fish oil showed that oil made from the whole fish, like Eskimo 3, was purer than oil made from only the livers of fish.

Special features of Eskimo 3:

- Free from harmful toxin levels
- Naturally stable
- Exclusive proprietary manufacturing process yields superior purity and efficiency
- Helps maintain healthy cholesterol levels that are already within normal range*
- No fish oil aftertaste.

Supplement Facts

Serving Size 3 softgels

Servings Per Container 35

Amount Per Serving

Calories	15
Calories from Fat	15
Total Fat	1.5 g
Cholesterol	5 mg
Eskimo-3® brand Fish Oil	1.5 g
