

Prescription For Disaster

DVD By Gary Null

Item Catalog Number: 33680

Prescription for Disaster is an in-depth investigation into the symbiotic relationships between the pharmaceutical industry, the FDA, lobbyists, lawmakers, medical schools, and researchers, and the impact this has on consumers and their health care.

During this thorough investigation, we take a close look at patented drugs, why they are so readily prescribed by doctors, the role insurance companies and HMO's play in promoting compliance, and the problem of rising health care costs. We will examine the marketing and public relations efforts on behalf of the pharmaceutical companies, including sales reps, medical journals and conferences.

Further, we look at alternatives to traditional pharmacology and drug therapy, such as vitamins and nutritional supplements, and why they are often perceived as a competitive threat to the drug manufacturers. Alternative therapies also include diet, exercise and a healthy lifestyle.

Prescription for Disaster takes you on a journey through the tangled web of big business, the way disease is treated today, and the consequences we suffer as a society.

Written, Produced and Directed: by Gary Null

Co-Director/Producer: Manette Loudon

Producer: David Chmura

Editors: Aaron Ekroth, Christina Choi, David Chmura

Associate Producer: David Slater

Assistant Editor: Kevin Lang

Graphic Design: Jay Graygor
