

Vitamin K Healing Cream  
***Anti-Redness · Purple Blotches***

**1 oz**

Item Catalog Number: 80102

***Dermatologist's Corner***

Renowned dermatologist Gary Goldfaden, M.D., has developed novel solutions for the most common skin problems encountered by maturing adults. Based on extensive clinical testing, these formulas are designed with potent antioxidant tea extracts (red, green, and white) to correct specific areas of concern, such as the appearance of darkness and puffiness under the eyes, fine lines, rough skin, loose skin, and more.<sup>61-70</sup> These products can be used in conjunction with any other skin treatments or products. They are specially formulated exclusively for Life Extension®.

Vitamin K Healing Cream helps people who suffer from areas of redness, purple blotches or bruising. It is excellent for lessening the appearance of small blood vessels on the face and body and promoting more even skin tone. Topical vitamin K helps minimize the appearance of bruises. Its effects are greater when used with topical arnica, a plant-based remedy used to minimize the appearance of bruising.

### References
