

Mega Silymarin with Isosilybin B

100 capsules

Item Catalog Number: 00702

The liver is a large glandular organ, whose functions include storage and filtration of blood, secretion of bile, detoxification of various substances and conversion of sugars into glycogen, which it stores. The liver is also responsible for processing many vitamins and nutrients into a form that can be utilized by the body, and processing many toxic chemicals for elimination.

Modern living involves daily exposure to substances that are toxic to our bodies, which imposes a heavy load on the liver. Therefore, a healthy liver is critical to well-being. Certain lifestyle risks and medical conditions make it all the more important to ensure that the liver is being maintained at its functional best.

In Europe and Asia, herbal liver tonics have been in common use for centuries. The effectiveness of the herbs used has been validated during the past decades through modern research and clinical studies. These herbs generally contain antioxidants, cell membrane stabilizing agents, bile secretion enhancing compounds, or nutrients that prevent depletion of endogenous antioxidants such as glutathione. Hepatoprotection is beneficial not only for the liver but also for the overall health and vitality of the body.

Milk thistle extract has long been valued for its role in ensuring healthy liver function, and it is also a powerful antioxidant.¹ Milk thistle extract consists of silibinin and other similar compounds. Until recently, scientists focused their research on silibinin, as it was the most abundant and biologically active ingredient found in milk thistle extract. Highly advanced extraction technology has now enabled scientists to isolate other silymarin constituents and to test their efficacy against various cell lines. Among the compounds tested, a silymarin constituent called isosilybin B proved to be the most efficient in maintaining healthy cell division.^{2,3}

References

Mega Silymarin with Isosilybin B is the first milk thistle extract to contain standardized, premium-quality potencies of silymarin, silibinin and isosilybin B, providing the full spectrum of milk thistle compounds that promote a healthy liver and prostate.²³⁻²⁷

The botanical extract in Mega Silymarin is a triple standardized milk thistle extract. In addition to an optimal 80% standardization of the main active compounds, silymarin flavonolignans, Mega Silymarin is further standardized to two highly active isomers—silibinin and isosilybin B. Most premium milk thistle extracts are devoid of or lack consistent amounts of the most active flavonolignan isomer isosilybin B.

Supplement Facts

Serving Size 1 capsule

Servings Per Container 100

Amount Per Serving

Milk Thistle Extract (*Silybum marianum*)

900 mg

[std. to 80% Silymarin (720 mg), 30% Silibinin (270 mg), and 4.5% Isosilybin B complex (40.5 mg)]

Other ingredients: rice flour, silica, magnesium stearate, gelatin.

Contains rice. This product contains NO milk, egg, fish, peanuts, crustacean shellfish (lobster, crab, shrimp), soybeans, tree nuts, wheat, yeast, gluten, or corn. Contains NO sugar, and no artificial sweeteners, flavors, colors, or preservatives.

Dosage and Use

- Take one capsule daily with or without food, or as recommended by a healthcare practitioner.

Warnings

- Keep out of reach of children.
- Do not exceed recommended dose.
- Do not purchase if outer seal is broken or damaged.
- If you have a bad reaction to product discontinue use immediately.
- When using nutritional supplements, please consult with your physician if you are undergoing treatment for a medical condition or if you are pregnant or lactating.
