Dosage and Use

- Take one to two scoops of powder and one to two packets of pills daily.
- The powder is designed to be taken in conjunction with the pill packets, working in harmony like a left and right shoe.

Powder:

- Mix one scoop of powder with fruit or vegetable juice in an electric blender.
- Take with meals.
- If you experience any nausea or gastric distress, then you may need to reduce your dosage. Try taking 1/3 of scoop with each of three meals, then gradually increase your intake to the desired level as your tolerance permits.

Pills:

- Take one to two packets of pills daily in divided dosages with ImmunoPower "shakes" at mealtime.
- If nausea develops, then reduce dosage or discontinue use.
- To make swallowing pills easier, chew a mouthful of food. Before swallowing food, take one of the ImmunoPower pills and swallow the pill and food altogether.

Caution

If you are taking prescription medication, then work with your doctor and pharmacist regarding possible drug-nutrient interactions.
