

Enhanced Super Digestive Enzymes with Probiotics

100 vegetarian capsules

Item Catalog Number: 01273

The aging process and certain health issues cause a reduction in the body's enzyme production.³¹ One effect of this reduction is a bloated feeling soon after eating a large meal. Enzymes are essential to the body's absorption and full use of food. The primary digestive enzymes are protease (to digest protein), amylase (to digest carbohydrate), and lipase (to digest fat). These enzymes function as a biological catalyst to help break down food. Raw foods also provide enzymes that naturally break down food for proper absorption.

The capacity of the living organism to make enzymes diminishes with age. Supplementing with enzymes can help promote optimal digestion and better absorption of nutrients.

Your colon is a perfect breeding ground for many opportunistic bacteria that can multiply and cause inflammatory upsets and other digestive problems. In order to maintain a healthy digestive system, your body hosts beneficial bacteria in its gastrointestinal tract that defend against harmful microorganisms. But poor diet, increasing age, constant stress and frequent antibiotic use can all rob you of these good bacteria. The result can be compromised immune function, disturbances in bowel function and other digestive discomforts. Many people still believe they can get the healthy bacteria they need by eating yogurt. But very few of the bacteria in yogurt ever survive the harsh acid journey through the stomach and reach the intestinal tract alive to effectively combat the harmful bacteria and keep your GI tract healthy.

A patented strain of *Bacillus coagulans* (Ganeden BC30®) is present in a spore form, surrounded by a natural protective shield. This protective layer helps *Bacillus coagulans* survive the heat and pressure of manufacturing, and ultimately the acids in the stomach. Up to 78% of these healthy bacteria arrive alive and ready to colonize your colon. These special bacteria have significant free radical scavenging abilities that give optimal support to your digestive system.

Enhanced Super Digestive Enzymes with Probiotics contains the patented Ganeden BC30® beneficial bacteria.

Enhanced Super Digestive Enzymes with Probiotics also provides a potent array of the enzymes amylase, protease and lipase that are designed to adapt to a variety of stomach acid pH conditions and provide powerful digestion of protein, fat, carbohydrates, milk lactose and vegetable cellulose. This newly upgraded formula also includes the advanced probiotic Ganeden BC30® to provide comprehensive support for your digestive tract all in one supplement.

Supplement Facts

Serving Size 2 vegetarian capsules

Servings Per Container 50

Amount Per Serving

Plant-Based Enzyme Blend

Pancreatin 8x†	400 mg
Protease II (from papain) (43,333 USP/mg or 7,800 PU)	18 mg
Protease III (60,000 FCC/gm or 1,300 HUT)	22 mg
Amylase (125,000 FCC/gm or 7,000 DU)	56 mg
Lactase (32,500 FCC/gm or 2,000 ALU)	64 mg
Cellulase (20,000 FCC/gm or 1,600 CU)	80 mg
Lipase (20,000 FCC/gm or 1,000 FIP)	50 mg
Whole fruit papaya powder	200 mg
GanedenBC30® (<i>Bacillus coagulans</i> GBI-30,6086) (supplying 333,000,000 CFU at time of manufacture)	18.6 mg

Other ingredients: vegetable cellulose (capsule), rice flour, vegetable stearate.

Contains milk. Contains corn and rice.

This product contains NO egg, fish, peanuts, crustacean shellfish (lobster, crab, shrimp), soybeans, tree nuts, wheat, yeast, or gluten. Contains NO artificial sweeteners, flavors, colors, or preservatives.

†Equal to 3200 mg pancreatin USP (amylase 40,000 USP units/gm, protease 40,000 USP units/gm, lipase 7200 USP units/gm).

GanedenBC30® is a registered trademark of Ganeden Biotech, Inc.

Dosage and Use

- Two capsules immediately before meals, or as recommended by a healthcare practitioner.
- Some people prefer to take this product after meals.

Warnings

- Keep out of reach of children.
- Do not exceed recommended dose.
- Do not purchase if outer seal is broken or damaged.
- If you have a bad reaction to product discontinue use immediately.
- When using nutritional supplements, please consult with your physician if you are undergoing treatment for a medical condition or if you are pregnant or lactating.
