

Blueberry Extract with Pomegranate & CocoaGold™

60 vegetarian capsules

Item Catalog Number: 01338

When scientists analyze fruits and vegetables for their antioxidant capability, blueberries rank among the highest in their capacity to destroy free radicals. Rich in antioxidants that combat oxidative stress and inflammation, blueberry extracts not only help preserve youthful cognitive function, but also help maintain healthy blood flow via several mechanisms, including maintaining already normal LDL levels and endo-thelial function.⁷⁹⁻⁸⁶

To augment the benefits of this healthful fruit, a new wild blueberry extract has been added to Blueberry Extract with Pomegranate and CocoaGold™ that provides more potent active ingredients than cultivated blueberries. Blueberry Extract with Pomegranate and CocoaGold™ now contains AuroraBlue®, which contains the only true wild Alaskan blueberries that grow in a completely natural environment without exposure to any chemicals. This complex of wild fruits belonging to the genus *Vaccinium* is rich in unique antioxidants (anthocyanins and pterostilbene being the two most active) and possesses nearly 10 times the antioxidant capacity of cultivated berries.

Blueberry Extract with Pomegranate and CocoaGold™ contains potent doses of pomegranate extract and cocoa polyphenols in just one capsule. Pomegranate fruit contains polyphenols, tannins, and anthocyanins—all beneficial antioxidants. Compounds known as punicalagins also found in pomegranate benefit arterial health by virtue of their ability to regulate healthy endothelial function.⁸⁷⁻⁸⁹

A standardized 50 mg extract of cocoa polyphenols in CocoaGold™, including the procyanidins, epicatechin and catechin, help maintain a healthy cardiovascular system by keeping the inner lining of blood vessels healthy.
