

Advanced Oral Hygiene
60 vegetarian mint lozenges
Item Catalog Number: 01300

The human mouth is teeming with bacteria. Brushing, flossing, and traditional dental care often aren't enough to escape the health risks of too much of the *wrong* kind of bacteria in the human mouth. With oral probiotics, we may be able to prevent or at least control the growth of the dangerous organisms where they originate.

Advanced Oral Hygiene is a new oral probiotic that provides the beneficial bacteria that can help block harmful bacteria that first develop in the mouth. This sophisticated oral probiotic therapy allows the healthy and naturally occurring organisms found in the body to out-compete the harmful bacteria.¹⁻³

Multiple health benefits

Advanced Oral Hygiene contains BLIS K12™ and *Bacillus coagulans*, a unique blend of two oral probiotics, which aim to triumph over many of the chronic threats to our health caused by oral microbes that may pose harm to the body. BLIS K12™ (*Streptococcus salivarius*) and *Bacillus coagulans* (GanedenBC30®) organisms naturally survive in human tissue, maximizing their health-promoting potential and providing help with the regulation of inflammation and cell destruction caused by the dangerous germs that originate in the mouth.

Regular use of Advanced Oral Hygiene could make a significant impact in protecting oral health,¹⁻³ which in turn can strengthen the immune system, ease inflammation, and help the body maintain good health.^{4,5}

Poor oral health is associated with risk factors throughout the entire body

Inflammation in the mouth can translate to poor health in other parts of the body. Traditionally, poor mouth conditions have a tendency to become chronic, producing a steady elevation of inflammation in other parts of the body that receive high blood flow—thereby “seeding” the entire system with circulating “cytokines.” These cytokines, or “chemical messengers,” produce inflammatory responses in tissues far distant from the mouth, and affect cellular behavior critical to the immune system's defense. When cytokine levels continue to increase—the occurrence of even more acute inflammation can also increase.

Advanced Oral Hygiene can offer relief and modulate the body's inflammatory response, making these “good” microorganisms found in the K12 and GanedenBC30® strain the ideal candidates for preventing inflammatory conditions in the body.⁵

Live life longer and healthier

In combination with a rigorous oral hygiene regime, Advanced Oral Hygiene provides the body with beneficial bacteria to naturally help protect the immune system and prevent harmful bacteria from colonizing throughout the body.

Supplement Facts

Serving Size 1 lozenge

Servings Per Container 60

Amount Per Serving

Probiotic Blend:

10 mg

GanedenBC30® (*Bacillus coagulans* GBI-30, 6086) and *Streptococcus salivarius* K12 (supplying 575 million CFU at time of manufacture)

Other ingredients: xylitol, mannitol, microcrystalline cellulose, stevia, spearmint, maltodextrin, cherry flavor, silicon dioxide, croscarmellose sodium, stearic acid, magnesium stearate.

Contains milk. Contains corn and yeast.

This product contains NO egg, fish, peanuts, crustacean shellfish (lobster, crab, shrimp), soybeans, tree nuts, wheat, gluten, or rice. Contains NO sugar, and no artificial sweeteners, flavors, colors, or preservatives.

Ganeden**BC30**® is a registered trademark of Ganeden Biotech, Inc.

Dosage and Use

- Dissolve one lozenge in mouth once or twice daily, or as recommended by a healthcare or dental practitioner.
- For best results, use after your oral hygiene program.

Warnings

- Keep out of reach of children.
- Do not exceed recommended dose.
- Do not purchase if outer seal is broken or damaged.
- If you have a bad reaction to product discontinue use immediately.
- When using nutritional supplements, please consult with your physician if you are undergoing treatment for a medical condition or if you are pregnant or lactating.
