

Super Saw Palmetto with Beta-Sitosterol

30 softgels

Item Catalog Number: 01407

A number of normal biological events in aging men affect prostate function and structure. Saw palmetto has been shown to interfere with DHT activity in the prostate, inhibit alpha-adrenergic receptor activity (to support normal urinary flow), and help control inflammatory actions in the prostate gland.¹⁻³

DeepExtract™ is a patented, ultra high pressure CO2 extraction technology that recovers the high molecular weight compounds such as naturally occurring carotenoids that are left behind by typical low pressure CO2 extractions. This state-of-the-art extraction technology insures the most desirable and complete bioactive extract profile available that most closely reflects the composition of premium, mature saw palmetto berries.
