

## 2000 MEDICAL UPDATES

Studies from throughout the world that can help you live longer

Updated Regularly!

## DISCLAIMER

THE INFORMATION IN "MEDICAL UPDATES" IS NOT INTENDED TO REPLACE THE ADVICE OF A PHYSICIAN. ANYONE SEEKING TO TAKE ANY OF THE THERAPIES DISCUSSED IN THIS SECTION, OR ANYWHERE ON THE LIFE EXTENSION FOUNDATION'S WEB SITE, SHOULD ONLY DO SO UNDER THE CARE OF A PHYSICIAN OR OTHER HEALTH CARE PROFESSIONAL.

Medical Updates review studies that are of importance to those seeking an extended life span. The complete scientific abstracts for these studies are available as a special service to Life Extension Foundation members. If you read here about new studies you want to learn more about or want to show to your doctor, send a self-addressed, stamped envelope to the Life Extension Foundation, P.O. Box 229120, Hollywood, Fla., 33022, USA. Please enclose a small donation (minimum \$1, please) to cover the costs of copying and processing. Or access the complete Scientific Abstracts online.

### December 2000 Table Of Contents

1. Vitamin E succinate decreases human tumor cell division, but not in normal cells
2. NAC delays age-associated memory impairment
3. Low fat, soy protein diet with isoflavones decreases tumor growth
4. Testosterone reduces neuronal secretion of Alzheimer's beta-amyloid peptides
5. Tomato consumption protects DNA and immune system
6. Anti-stress effects of DHEA
7. Rye and soy vs. prostate cancer
8. Selenium, lipid peroxidation and toxic metal levels
9. Deprenyl inhibits tumor growth
10. Curcumin prevents kidney disease
11. Estrogen levels and Alzheimer's disease among postmenopausal women
12. Sexual behavior and risks for prostate cancer
13. Free vs. total PSA screening
14. Fish oil vs. corn oil and the immune response

### November 2000 Table Of Contents

1. Dietary antioxidant intake and the risk of intestinal cancer
2. Role of antioxidant enzymes in brain tumors
3. Antioxidant-rich diets improve motor learning
4. Alpha-lipoic acid and diabetic neuropathy
5. Tomato juice, vitamin E and C and type 2 diabetes
6. Green tea, grape juice, and colon cancer
7. Supplements and exercise in the elderly
8. Alpha-lipoic acid lowers blood pressure
9. Ginkgo biloba protects and rescues brain cells
10. Benefits of fruits and vegetables
11. Deprenyl protects cultured nerve cells

12. Genistein inhibits PSA expression in prostate cancer cells
13. NAC modulates growth of human prostate cancer cells
14. Vitamin E prevents brain cell death
15. Olive oil, lipid peroxidation and glutathione
16. Glutathione and longevity
17. NAC, glutathione induction, and epilepsy
18. Physical activity and oxidative stress during aging

## October 2000 Table Of Contents

1. Selenium modulates breast cell proliferation
2. Cancer inhibition from tea extracts
3. Ginkgo vs. skin inflammation and photo-aging
4. Curcumin prevents kidney toxicity
5. Control of blood pressure and risk of stroke
6. Lycopene protects DNA from free radical damage
7. Alpha-lipoic acid reverses age-related changes
8. Antiobesity activity of banaba leaf extract
9. Melatonin protects red blood cells
10. Fish oil vs. corn oil in tumor proliferation
11. Antioxidants prevent alcohol-induced liver DNA damage
12. Glycine vs. acute ischaemic stroke
13. GH and osteoporosis in elderly women
14. Improved glucose sensor implant
15. Vitamin E increases stability of refined olive oil
16. Heart protection with red wine extract and resveratrol
17. Benefits of HRT in menopausal women
18. Aminoguanidine and diabetes mellitus
19. The virus therapy of cancer
20. Pyruvate improves heart performance
21. Dietary enzymes protect against macular degeneration
22. Diet and lung function in middle aged men
23. Prozac increases bioavailability of oral melatonin
24. Telomeres and the immune response
25. Herpes virus selectively destroys liver cancer
26. Vitamin D-3 increases effectiveness of immune system therapy
27. PUFAs modulate mean life span
28. Vitamin E suppresses free radicals in macrophages

## September 2000 Table Of Contents

1. Effects of SAME on brain oxidative stress
2. Effects of lowered melatonin secretion in middle age
3. Citicoline, Alzheimer's disease, and cognitive performance
4. Grape juice inhibits human platelet aggregation
5. Free radical stress in rheumatoid arthritis
6. Carotenoids and colon cancer
7. Vitamin B status in those with chronic fatigue syndrome
8. Antioxidative effects of curcumin in liver
9. Risk of heart attack with tricyclic antidepressant medications
10. Low blood antioxidant activity and neurological impairment in stroke
11. Unfiltered coffee increases blood homocysteine
12. Oxidative stress and Alzheimer disease
13. Vitamin E and Alzheimer disease
14. St John's wort for depression
15. Fish oil protects cartilage from degradation
16. Protective effects of L-arginine on heart injury
17. Kava extract for anxiety

18. Ginkgo reduces fluid and cell injury following heat stress
19. Melatonin reduces quinolinic acid-induced lipid peroxidation in rat brain homogenate
20. Ginkgo does not inhibit MAO A and B in living human brain
21. Biological effects of resveratrol
22. Growth inhibition of liver cancer by retinoic acid
23. Physical activity and stroke mortality in women
24. Use of complementary health practices with prostate cancer
25. Radiotherapy vs. surgery in prostate cancer
26. Caloric restriction reduces heat induced cellular damage
27. Skin collagen glycation predict early death in mice
28. Low cholesterol level and death due to cancer

### August 2000 Table Of Contents

1. IGF-1 is not a useful marker of prostate cancer
2. NAC boosts glutathione level in immune system
3. Beneficial effects of NAC in diabetes
4. Effect of Ginkgo/drug combination on pancreatic cancer
5. Melatonin and deprenyl protect against free radical induced brain damage
6. The role of ultrasound in detection of stroke risk
7. Neuroprotective effects of progesterone
8. Protective effect of aminoguanidine on the liver

### July 2000 Table Of Contents

1. Selenium inhibits angiogenesis in breast cancer
2. DHEA inhibits carcinogen-activating enzyme
3. Ginkgo biloba extract and peripheral arterial occlusive disease
4. Pattern of alcohol drinking and progression of atherosclerosis
5. Curcumin inhibits colon cancer cell proliferation
6. Health benefits of rice bran oil
7. Vitamin E protects against liver damage
8. DHEA treatment for those HIV+
9. Green tea extract decreases iron-induced free radical damage
10. Conjugated linoleic acid (CLA) reduces breast cancer risk in animals
11. Alcohol consumption and cancer mortality
12. Chemoprevention of lung cancer by IP6 derivative
13. IP6 inhibits breast cancer
14. Prevention of colon cancer by components of dietary fiber
15. Antiplatelet activity of inositol hexaphosphate (IP6)
16. Inositol hexaphosphate (IP6) inhibits cancer and lowers lipids
17. The cancer problem
18. Selenium deficiency and viral virulence

### June 2000 Table Of Contents

1. Vitamin C and cataracts in the elderly
2. Folic acid, vitamin B12, and atherosclerosis
3. Niacin as a potential AIDS preventive factor
4. Simple protection from 2nd heart attack
5. Curcumin stimulates immune system activity
6. Melatonin reduces lipid peroxidation and inflammation of the pancreas
7. Prevention of type 2 diabetes
8. CoQ10 vs. hypertension
9. Development of chronic fatigue syndrome

10. Estrogen and cardiovascular disease
11. Value of exercise in Parkinson's disease
12. Fish oil and sex hormones may help prevent Alzheimer's
13. Aging and continuous vs. intermittent exercise

## May 2000 Table Of Contents

1. Vitamins decrease blood homocysteine levels
2. BHA and BHT as antioxidant food additives
3. Invasion of human coronary artery cells by oral bacteria
4. Vitamin E treatment of CNS disorders in the aged
5. Curcumin enhances wound healing
6. Vitamin B-12 deficiency in the elderly
7. Vitamin B-12 and folic acid deficiency in elderly
8. Cryosurgery for prostate cancer
9. Vitamin D: Non-skeletal actions and effects on growth
10. Curcumin inhibits development of colon cancer
11. Bacterial infections may cause atherosclerosis
12. Exercise prevents premature death and CHD
13. Arginine, taurine and homocysteine in CD
14. Combination therapy for malignant melanoma
15. Beta-carotene decreases risk of prostate cancer
16. Interaction of St John's Wort with digoxin
17. Curcumin inhibits genetic cause of cancer
18. CoQ10 decreases DNA damage in human lymphocytes
19. Melanoma vaccine
20. Human longevity at the cost of reproductive success
21. Antioxidant supplementation reverses age-related neuronal changes
22. Safflower oil vs. perilla oil on lipid metabolism
23. Osteoporosis in men - prevention and management
24. GH deficiency: Signs, symptoms, and diagnosis
25. Curcumin and cell membrane dynamics

## April 2000 Table Of Contents

1. Gamma-tocopherol vs. blood clotting
2. Vitamin B-12 deficiency: A new risk factor for breast cancer?
3. Tea flavonoids may protect against atherosclerosis
4. Protective effect of N-acetylcysteine (NAC)
5. Anti-platelet activity of soy sauce
6. Oral vitamin c benefits arteries and platelets
7. Risk factors and outlook for stroke
8. Plant foods, antioxidants, and prostate cancer risk
9. Longevity and decreased metabolic rate
10. Inhibition of telomerase limits the growth of human cancer cells
11. Long-term treatment prevents HIV expansion

## March 2000 Table Of Contents

1. Aspirin prevents colorectal cancer
2. Blood homocysteine level and mortality in the middle-aged and elderly
3. Health effects of legumes and soybeans
4. Mortality in vegetarians vs. non-vegetarians
5. Health-promoting properties of common herbs
6. The Oxford Vegetarian Study
7. Essential fatty acids in health and chronic disease
8. Effects of Ginkgo and DHEA on Alzheimer's

9. Effects of heavy-resistance training on hormonal responses
10. Melatonin and the reduction or alleviation of stress
11. Melatonin protects cells from free radical damage
12. Aminoguanidine vs. E. Coli endotoxin
13. Wine, beer, and mortality in middle-aged men
14. Aerobic exercise can reverse age-related circulatory changes
15. Prospects for cancer prevention

## February 2000 Table Of Contents

1. Effect of dietary lycopene on abnormal growth in the colon
2. Vitamin D-3 blood levels and Colorectal cancer
3. Effects of Ginkgo biloba extract on memory
4. Protective effects of Biostim, a bacterial immunomodulator
5. Tocotrienol: A review of its therapeutic potential
6. Effects of ginkgo biloba on depression
7. DHEA dose and serum levels
8. Zinc protects against ultraviolet-induced DNA damage
9. Lifetime exercise activity and breast cancer risk
10. The effects of Chlorella on natural killer cells

## January 2000 Table Of Contents

1. Human longevity at the cost of reproductive success
2. Antioxidant supplementation reverses age-related neuronal changes
3. IGF-1 blocks the aging-related loss of skeletal muscle function
4. Safflower oil vs. perilla oil on lipid metabolism
5. Estrogen therapy in preventing and slowing the progression of dementia
6. Chronic pancreatitis and antioxidant therapy
7. Osteoporosis in men-prevention and management
8. GH deficiency: Signs, symptoms, and diagnosis
9. Curcumin and cell membrane dynamics
