Medical Updates review studies that are of importance to those seeking an extended life span. The complete scientific abstracts for these studies are available as a special service to Life Extension Foundation members. If you read here about new studies you want to learn more about or want to show to your doctor, send a self-addressed, stamped envelope to the Life Extension Foundation, P.O. Box 229120, Hollywood, Fla., 33022, USA. Please enclose a small donation (minimum \$1, please) to cover the costs of copying and processing. Or access the complete Scientific Abstracts online.

January 2002 Table Of Contents

1. Micronutrients and innate immunity
2. Deficiency of folic acid and vitamin B-12 (cobalamin)
3. Vitamin E and coronary heart disease
4. Effects of green tea on spore-forming bacteria
5. Garlic enhances circulatory antioxidants
6. Effects of UVA and UVB rays on antioxidant enzymes in the eye
7. Inhibition of hepatitis by aminoguanidine
8. DHEA reduces neurotoxic effects of corticosterone
9. Curcumin and cancer prevention
10. Green tea benefits digestive tract
11. DHA protects small intestine in mice
12. Neuroprotective strategies for Alzheimer's disease
13. Component of red grapes stops growth of leukemia cells
14. Prevention of cell adhesion in treatment of cancer
15. Anti-angiogenic agents and therapies in development
16. Effects of growth hormone treatment in obese men
17. Phytosterols as anticancer components
18. Atherosclerosis

February 2002 Table Of Contents

1. Curcumin protects against lung injury
2. Melatonin increases muscle and liver glycogen
3. Role of vitamin C in atherogenesis and vascular dysfunction
4. Protective effect of aminoguanidine on brain damage

5. Preventing hip fracture
6. Antioxidants/caloric restriction protects against liver cancer
7. Effect of L-carnitine on glycoprotein status
8. Cardiovascular disease risk factors and menopausal status
9. Effect of curcumin and dietary n-3 fatty acids on macrophages
10. Antioxidants and free radicals in exercise
11. Genetic Link: periodontal disease, clotting factor and heart disease
12. Treating chronic insomnia without drugs
13. Caloric intake and aging
14. Diet and cancer prevention
15. Red meat consumption linked to digestive system cancers
16. Beer may reduce heart disease risk
17. Americans do not drink enough water
18. Estrogen use and early onset of Alzheimer's disease

March 2002 Table of Contents

1. Effect of antioxidants on metabolism of the eye and brain
2. GH replacement therapy and VLDL cholesterol
3. DHEAS decreases overactivity of immune system
4. Grape seed extract weakens development of atherosclerosis
5. Selenium, vitamin E and defense against viruses
6. The IGF-I response to very low GH doses in human aging
7. Prevention or reversal of long-term depression by pregnenolone sulfate
8. Synergistic inhibition of prostate cancer

April 2002 Table of Contents

1. Effect of antioxidants on metabolism of the eye and brain
2. GH replacement therapy and VLDL cholesterol
3. DHEAS decreases overactivity of immune system
4. Grape seed extract weakens development of atherosclerosis
5. Selenium, vitamin E and defense against viruses
6. The IGF-I response to very low GH doses in human aging
