

## NaPCA w/Aloe Vera

### **8 fl oz bottle**

Item Catalog Number: 00168

NaPCA with Aloe Vera is a pH balanced, concentrated solution of the sodium salt of pyrrolidone carboxylic acid (the natural moisturizing factor found in human skin) combined with the highest quality aloe vera gel.<sup>81</sup> NaPCA is synthesized from glutamic acid, a nonessential amino acid. The skin contains natural moisturizers, the most important being NaPCA. Old skin contains only about half the amount of NaPCA that is found in young skin. The ability of skin to hold moisture is directly related to its NaPCA content. It is water, not oil that keeps skin soft and supple. NaPCA pulls water out of the air, moisturizing the skin, improving its appearance, and giving it a moist and youthful glow. This is not a cosmetic cover-up, it is a physiological correction of an age-related deficiency state. NaPCA with Aloe Vera provides quick relief from dry and cracked skin, burns, shaving irritations, detergent rash and other minor skin irritations. The aloe vera gel in this fine product is produced from the crystal clear gel of *Aloe barbadensis* by a unique extraction and purification process exclusively developed by Twinlab. The aloe vera gel has never been powdered, frozen or reconstituted. Therefore, it retains its maximum biological activity and effectiveness.

## References

## Ingredients

Aloe vera gel, NaPCA (the sodium salt of pyrrolidone carboxylic acid), purified water, methylparaben.

## Dosage and Use

- After bath or shower, spray NaPCA on the hands and apply to the face and other skin areas.
- It can be applied under makeup or skin cream, or used under shaving cream for a closer, nonirritating, smoother shave.
- NaPCA can even be sprayed on live plants to enrich their moisture content.
